

Design Guidelines for Children's Exhibits

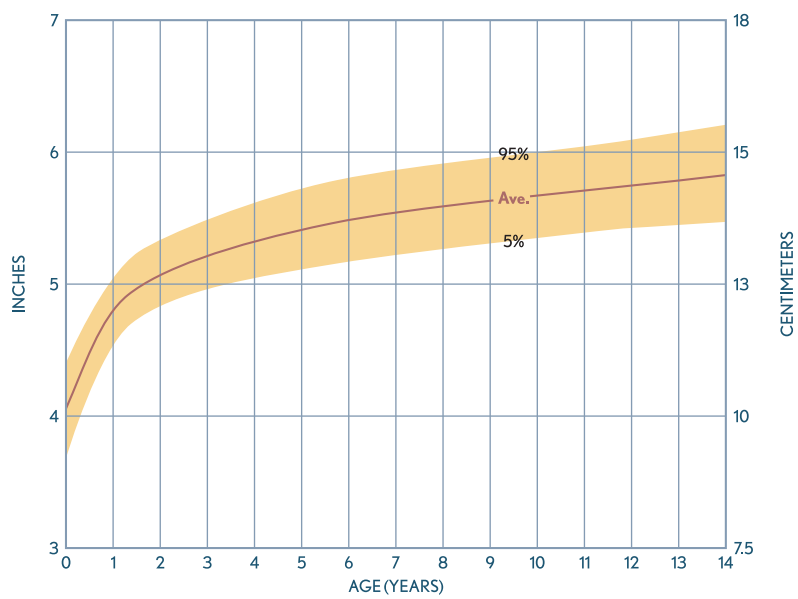

HEIGHT BOYS & GIRLS

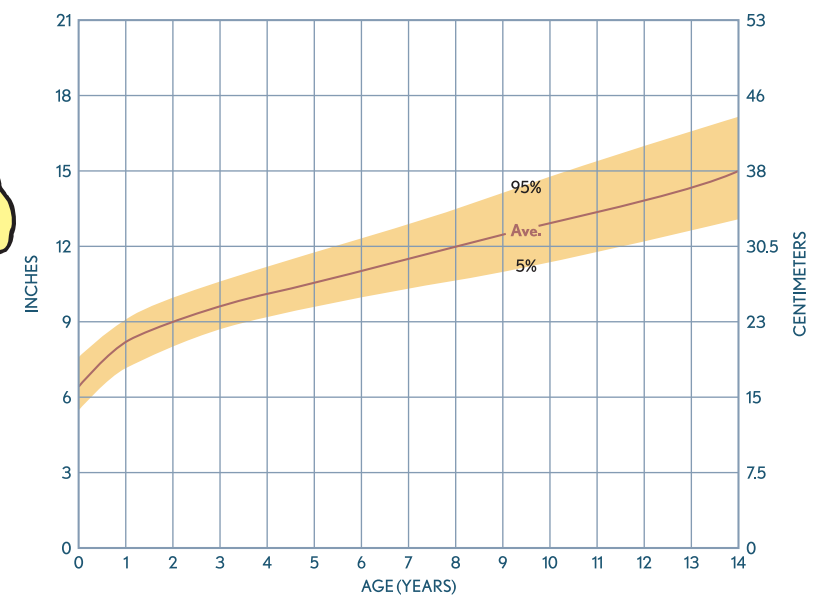

WEIGHT BOYS & GIRLS

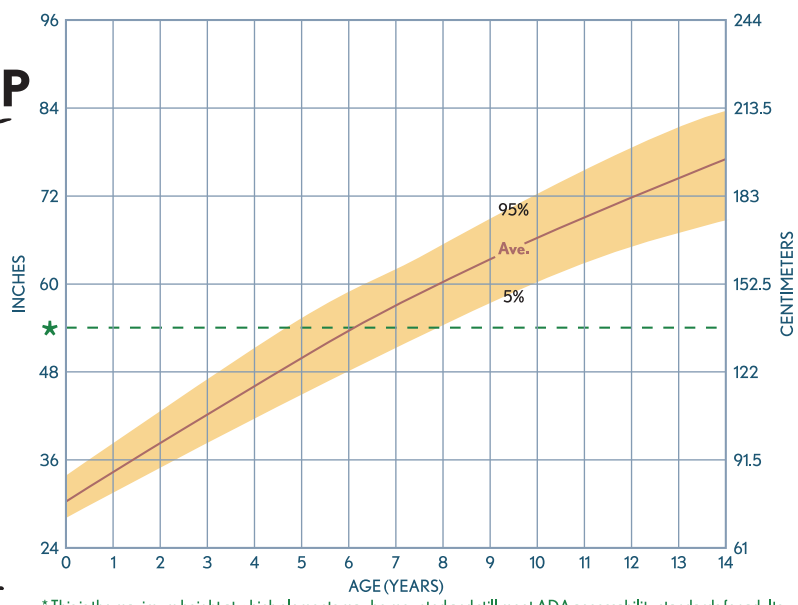

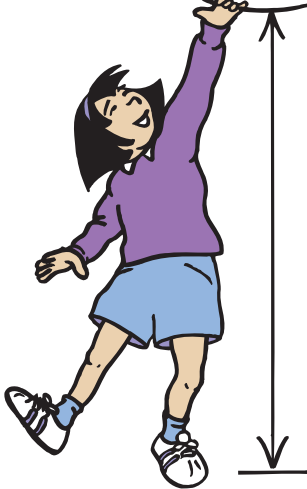

HEAD WIDTH

SHOULDER WIDTH

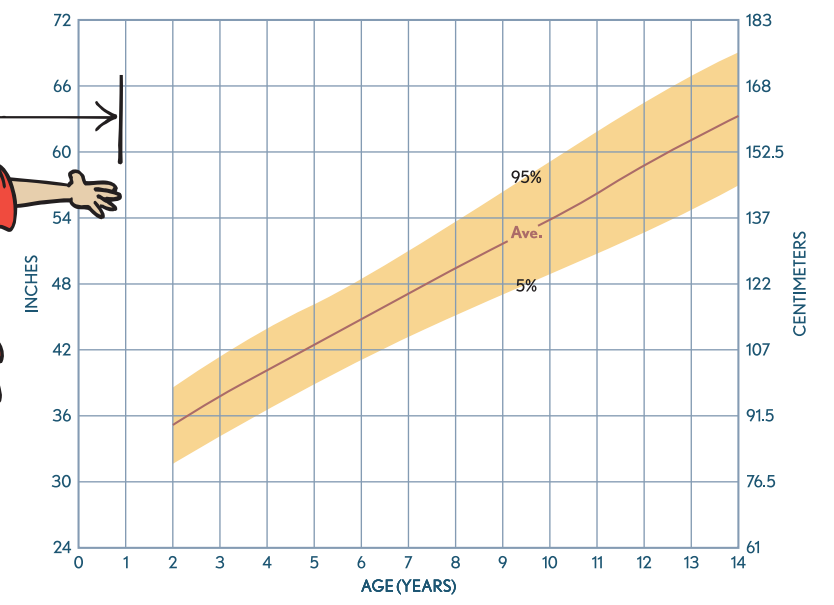

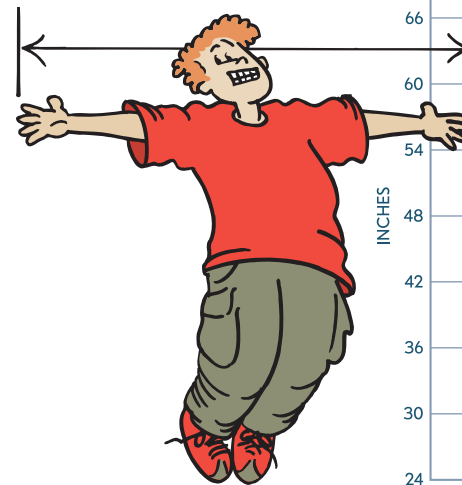

VERTICAL REACH TO GRIP

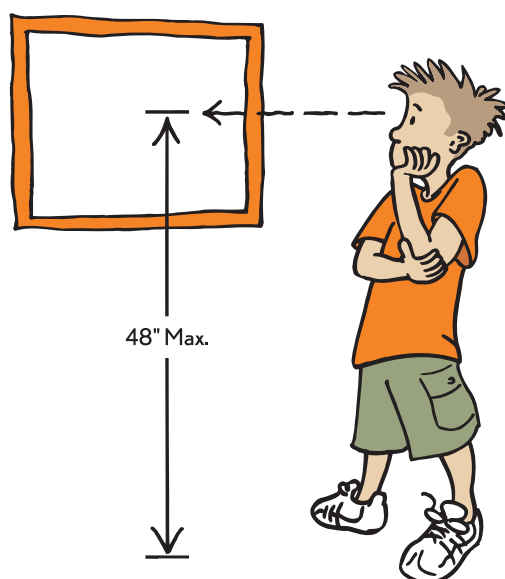

* This is the maximum height at which elements may be mounted and still meet ADA accessibility standards for adults.

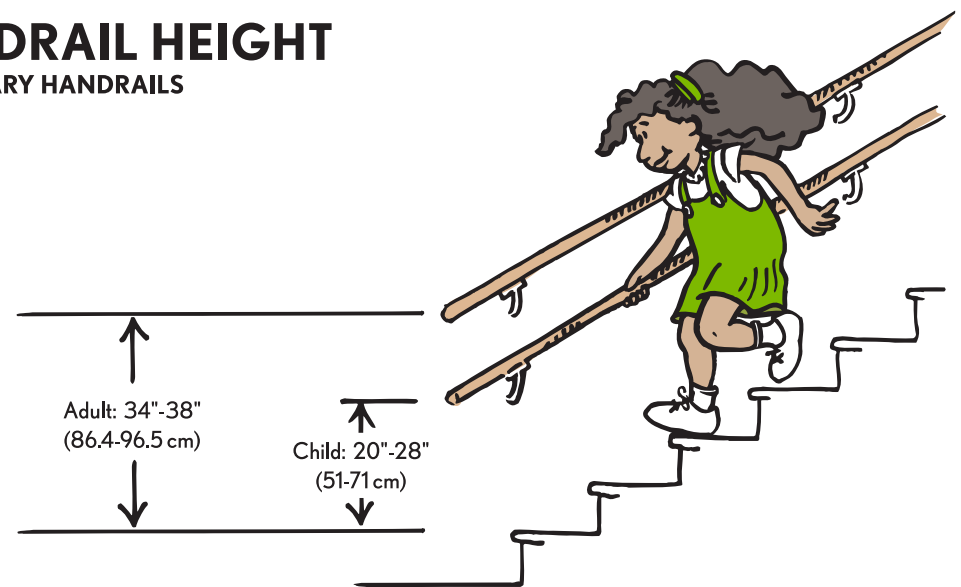

ARM SPAN

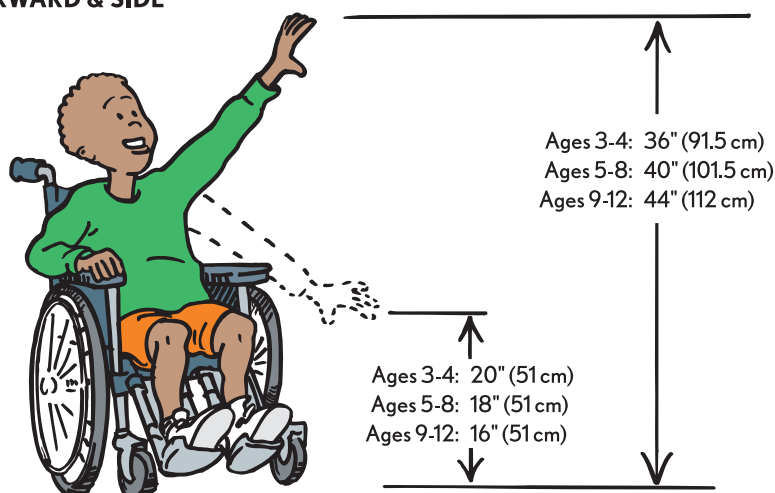

SIGNAGE

HANDRAIL HEIGHT SECONDARY HANDRAILS

ACCESSIBLE HIGH AND LOW REACH TO GRIP FORWARD & SIDE

Poster information obtained from "Design Standards for Children's Environments" by Linda Cain Roth, AIA, published by McGraw-Hill 2000. Used with permission from the author. The data presented is based largely on studies of children from the United States and Great Britain. This must be taken into consideration when designing for populations that may vary in stature from these groups.
